

## Boost your team dynamics during meetings, conventions and training sessions

### You regret:

- Your participants' **lacking involvement**
- The **missing interactivity** during events
- **Shortcomings in the appraisal** of the learners' know-how
- **Difficulties encountered** in consolidating voting responses
- The **heavy, inhibiting technologies** currently used

You wish to stimulate, motivate, and involve your participants ...

**Right now! Get a hold of your knowledge with the TouchKnow line**

### TouchKnow, an innovative concept, providing the possibility to:

- **spicen up your teaching contents** by establishing pleasant and participative relationships between tutor and public in training
- **support your collaborative exchanges** by creating synchronous or asynchronous sessions between participants who may be **located in different spacetimes**
- **centralize information** such as participation level, voting results or appraisal, sessions' agenda, ...

**TouchKnow,**  
a complete line of products  
and services:

- **E-vote boxes** associated with a **USB reception base**
- A **dedicated server**, authorizing management of synchronous and asynchronous sessions, and mutualizing your training or your communication supports
- A **player** with mobile/PDA/PC/Mac **compatibility**
- **Support and training** services
- Your solution's **tailor-made development**

**Features and configurations**
